NORSOK Standards
for use in the oil and gas industry

M-001 Materials selection
M-004 Piping and equipment insulation
M-101 Structural steel fabrication
M-102 Structural aluminium fabrication
M-120 Material data sheets for structural steel
M-121 Aluminium structural material
M-122 Cast structural steel
M-501 Surface preparation and protective coating
M-503 Cathodic protection
M-506 Corrosion rate calculation model
M-601 Welding and inspection of piping
M-630 Material data sheets and element data sheets for piping

N-001 Integrity of offshore structures
N-003 Actions and action effects
N-004 Design of steel structures
N-005 In-service integrity management of structures and marine systems
N-006 Assessment of structural integrity for existing offshore load-bearing structures

P-002 Process system design
P-003 Safe use of lifting equipment
P-004 Piping layout, design and structural analysis
P-005 Compact flanged connections
H-003 Heating, ventilation and air conditioning (HVAC) and sanitary systems

S-001 Technical safety
S-002 Working environment
S-003 Environmental care
T-001 Telecom system design
T-002 Telecom systems for mobile offshore units
E-001 Electrical systems
C-001 Living quarters area
C-002 Architectural components and equipment
C-006 Helicopter decks on offshore installations

M-001 Drilling facilities
M-002 Well intervention equipment
M-007 Well testing systems
D-015 Well integrity in drilling and well operations

Y-002 Life extension for transportation systems

S-001 Documentation for operation (DFO)
S-CR-002 Component identification system
S-DP-002 Coding system
S-003 Technical information flow requirements
S-004 CAD symbol libraries
S-005 2D-CAD drawing standard
S-006 Preservation
S-007 Mechanical completion and commissioning
S-008 Risk based maintenance and consequence classification
S-013 Risk and emergency preparedness assessment
S-015 Temporary equipment
S-018 Supplier’s documentation of equipment

T-101 Telecom system design
T-003 Telecom systems for mobile offshore units

I-001 Field instrumentation
I-002 Safety and automation system (SAS)
I-003 Piping and valves
I-004 Piping installation, flushing and testing
I-005 Compact flanged connections
I-006 Assessment of structural integrity for existing offshore load-bearing structures

L-001 Piping and valves
L-002 Piping system layout, design and structural analysis
L-003 Piping details
L-004 Piping installation, flushing and testing
L-005 Compact flanged connections

H-003 Heating, ventilation and air conditioning (HVAC) and sanitary systems

M-001 Integrity of offshore structures
M-003 Actions and action effects
M-004 Design of steel structures
M-005 In-service integrity management of structures and marine systems
M-006 Assessment of structural integrity for existing offshore load-bearing structures

Z-001 Documentation for operation (DFO)
Z-002 Component identification system
Z-003 Technical information flow requirements
Z-004 CAD symbol libraries
Z-005 2D-CAD drawing standard
Z-006 Preservation
Z-007 Mechanical completion and commissioning
Z-008 Risk based maintenance and consequence classification
Z-013 Risk and emergency preparedness assessment
Z-015 Temporary equipment
Z-018 Supplier’s documentation of equipment

M-050 Qutation of manufacturers of special materials
M-700 Qualification of non-metallic sealing materials and manufacturers
S-WA-006 HSE-evaluation of contractors
R-005 Safe use of lifting and transport equipment in onshore petroleum plants
